

United Nations Association Haiti (UNA-Haiti) & The Haiti/ Ayiti Agenda 2030 Initiative

"Solidarity with Haiti in the Future We Want"

August 2025 -October 2026

I. About UNA-Haiti

The United Nations Association - Haiti (UNA-Haiti) is a non-governmental organization dedicated to fostering global solidarity, sustainable development, and democratic governance in Haiti. Founded in 2004 by internationally renowned development expert Harvey Dupiton, UNA-Haiti was established as a home-grown institution operating within the World Federation of United Nations Associations (WFUNA) network, advocating for peace, human rights, and equitable progress.

Over the years, the organization mirrored the very challenge facing the nation it represents: the problem of organizational cohesion and institutional integrity. Like many Haitian institutions, UNA-Haiti experienced its share of internal dilemmas stemming from leadership that was awarded rather than earned. Recognizing that national crisis begins with internal division and weak governance, UNA-Haiti undertook a deliberate process of reorganization. Determined to rebuild on solid ground, the leadership applied a vital lesson learned: sustainable institutions require earned trust, accountability, and the right balance of strategic partners who truly reflect the collective interest.

Since 2025, UNA-Haiti has operated under the aegis of the NGO Committee on Private Sector Development—a coalition of organizations in Consultative Status with the United Nations Economic and Social Council (ECOSOC)—where it serves under the Least Developed Countries Taskforce.

Building on these institutional principles, UNA-Haiti launched the **Ayiti Agenda 2030 Initiative** in 2025 (and *The Haiti Agenda Manifesto*, October 2026). Conceived as a roadmap to address the systemic collapse of state authority and the recurring cycle of crisis, the Initiative addresses the foundational problem of community organization. It provides a platform for Haitians at home and across the diaspora to bridge historical divisions, build strong institutions over strongmen, and achieve a broad national consensus around the future direction of their country.
